

Designed to suit all study needs.

Productive environment - Students are able to work with a small group or an entire class. Dedicated chat rooms for tutorial/practical sessions and revision. Study with the cohort or your friends anytime, anywhere.

External sources, all in one – StudyHub provides access to many different external resources in one place. Eliminating the need to remember account details for multiple sites.

StudyHub

StudyHUB

Why Choose StudyHub?

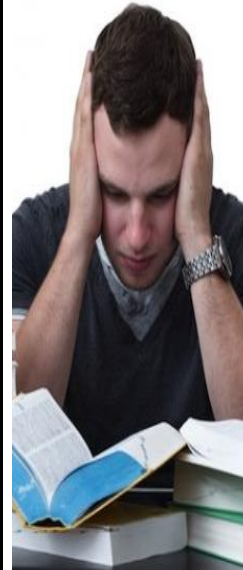

- The overall layout of StudyHub is designed to be neat and user friendly. Providing an excellent, unforgettable user experience.
- Studies show that students tend to forget their usernames and passwords for many sites they have used only once for a course. StudyHub allows students to access the same resources from other sites but on a single platform.
- Tired of using multiple communication channels to discuss group work with others? Create your own chat rooms with your friends and classmates and discuss anything here on StudyHub!

StudyHub is easily accessible from any mobile device. Whether you are studying at home or on your way to campus, StudyHub is always here to assist you.

As university students ourselves, we truly understand the frustration of not being able to know who is doing the same courses as you, getting your questions answered as soon as possible, forgetting account details for multiple sites that you used once and trying to locate useful resources that are scattered all over the internet.

– Sad Squad

About Us

Sad Squad is a team of five dedicated students who specialize in different areas such as Commerce, Multimedia, Arts and Information Technology.

Sad Squad has put in a significant amount of effort into research, user testing and prototyping to create the best all-in-one study platform for all university students. Aiming to solve all common university student problems.

Sad Squad plans to expand the platform to high school students in the future.

Convenience

“Tutorial and Practical class discussions anytime, anywhere? Yes please!”

- Business Students

“Organising groups and allocating group work have never been this easy.”

- Engineering Students

Key Features

- **Centralised resources** – access to different external resources on one single application.
- **One platform, infinite possibilities** – students can join and communicate with other students that are enrolled in the same course in various chat rooms for study purposes. Students can also collaborate with the group, self-assign tasks and monitor progress of tasks.

Satisfied Users
